

Investor Spotlight: Jason & Becca Carmichael

Jason & Becca Carmichael have been a part of the Saber family since 2011 and 2014, respectively. Jason teaches Upper School History and Becca teaches English in the Middle School.

What gets you excited about the new building?

Jason: As a teacher, I see this as an investment in the future of our school. This is only going to enhance our students' feeling of "This is my school. This is my home."

Becca: I am excited about the opportunities for collaborative work in the new space. So far, we have done a good job finding opportunities to collaborate, but it's been tricky with the space that we have. There's so much more this building will allow us to do.

Why have you chosen to give to Building on Strengths?

Becca: The students are just about to burst with excitement about the new building! We are pleased to be a part of that.

Jason: TNCS is a transformative place. It sounds like hyperbole, but I have seen it happen here. We transform lives. This new growth helps not just our students

and our teachers, but the whole Richmond community.

Fundraising Update

Thanks to nearly 250 donors, *Building on Strengths* **now needs just over \$200,000 to successfully complete our project.** Thanks to everyone who has invested, our new building will soon be inspiring these amazing students. The

clock is ticking as the building nears completion. Your help is still needed to help us meet our goal.

Gifts of \$1,000 or More Honored in Building Lobby

Building on Strengths has only been successful because of the support of donors at all levels. So that we may honor

our friends, the school is preparing a place in the lobby where all donors who invest \$1,000 or more will be recognized. We'd love your name to be on that wall! You can make your support payable for up to three years if it's easier. Please [email](#) or call Dan Stackhouse 804.264.3276 to learn more.

Construction Update

Spring-like weather has been a gift for our Hourigan Construction team! Crews have been taking advantage of our warm, dry days lately to finish the masonry work, prepare the second floor finish (called EIFS), and complete the installation of wiring and sheetrock. Our National Honor

Society chapter took a tour of the building recently to check on our progress. Every day this building gets closer and closer to reality!

The Hermitage Road entrance shows the final second floor finish, plus windows and doors!

National Honor Society members were among the first students to see inside our new space.

Junior Kaki A. gazes up at the second floor atrium.
